

Initiatives

Supporting Indian gherkin farmers to improve quality

Challenge:

Nowadays, certifications are key enablers to access international markets but producers from remote areas require support to implement the compliance criteria from important certification schemes correctly.

Location:
Rolla, Karnataka, India

What did we do?

- // Conduct a field staff training for local partner and Bayer working teams, including a risk assessment at the captive farm of our partners.
- // Record keeping were observed during the program.
- // Conducted training on Good Agricultural Practices for 45 producers.
- // Customized advice and assessment for producers, resulting in 30 verified producers with localg.a.p.

Benefits:

- // Improvement of farming practices, data recording and risk assessments for the gherkin production.
- // Controlled quality and traceability through the registration of producers in the GLOBALG.A.P. database.
- // Facilitation of market entry and resulting income increase.
